

University Medical Center Freiburg is a full-service hospital and one of the largest in Europe. More than 10,000 employees care for patients' health and well-being around the clock. The hospital has been certified by the KTQ® since 2005.

The Institute for Medical Biometry and Statistics at the University Medical Center Freiburg (Germany) is offering a

■ Postdoctoral position in Applied Biostatistics

Your tasks:

- The researcher will be working in various areas related to regression modelling in low- and high-dimensional data with an emphasize on issues of topic group 2 "Selection of variables and functional forms in multivariate analysis" of the STRATOS (STRengthening Analytical Thinking for observational Studies) initiative (for details see <http://stratos-initiative.org> or the paper Sauerbrei et al, Statistics in Medicine, 2014)

Your profile:

- A PhD in Statistics, Biostatistics, Bioinformatics or Mathematics or practical experience with regression modelling of at least 2 years
- Business fluency in both spoken and written English and strong interest in interdisciplinary research experience in programming with R, Stata, Matlab or C and in designing and conducting simulation studies is highly desirable
- also an EU work permit is required for employment

Our offer:

- The contract is according to the German TV-L system. Annual gross income will be about €48.000 to €52.000 depending on qualifications and years of experience. After payment of taxes and contributions for social security and supporting systems about 55% for singles and about 65% for the main earner of a married couple will remain.
- This post is full-time, currently fixed for 3 years and can start as soon as possible. It is likely to be extended for some more years.

For some decades the Institute has successfully undertaken several other research projects in the areas of clinical epidemiology, biostatistics and clinical studies. You will join an internationally recognized biostatistical research group. The STRATOS initiative is a unique opportunity to work with many colleagues all over the world developing guidance for the design and analysis of observational studies. Also, the Institute is currently developing a new research focus in the integration of heterogeneous data sources.

Freiburg is an old University town situated in the warmest and one of the most beautiful areas of Germany.
